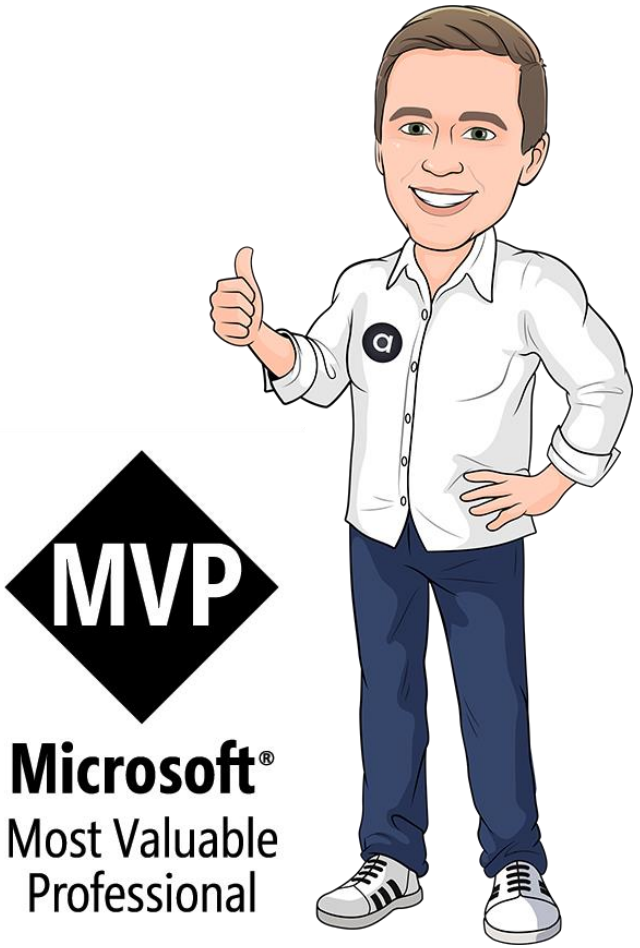
- Blog: www.techguy.at | www.au2mator.com
- GitHub: github/seidlm | github.com/au2mator
- Father of 2 Sons (1 and 4 Years)



au2mator

- Founded in 2015 in Austria/Europe with the Idea to provide

  a Web Frontend to trigger System Center Orchestrator Runbooks

- 2019 Enhanced the Web Frontend to trigger 4 Automation Engines
  - PowerShell
  - Azure Automation
  - System Center Orchestrator
  - System Center SMA

- 2022, we are happy to help many customers all around the Globe to

  Self Service their IT with au2mator Self Service Portal

- GET au2mated - Contest

How To

Automation

- Build Automation (SCO, SMA, AA, PowerShell)
- Initialize Data
- Return Data

Service

- Create Service
- Configure Questions
- Approval Workflow
- Configure Role Based Access

Request

- User can start Request
- Waiting for Approval
- Automation will be triggered
- Get Return Data from Automation

WHY

INCREASE SECURITY

Reduce your Domain Admins or Application Admins by providing Self Service Forms and Automation.

No accident errors can happen

INCREASE QUALITY

If you get three different answers from 3 other people on how they implement a specific Process, you need to react!

SAVE TIME

Build Self Service Forms to delegate routine tasks to your End User or Help desk Team.

No IT Admin needs to reset User Passwords or create new Users.

SAVE MONEY

Do not pay for people, doing daily routine tasks on your business.

Use them to take your IT to the next level and increase the Quality

HAPPY USERS

When a User is solving a Request in a short time, they are happy and more reliable

HAPPY IT STAFF

Nothing is more boring than doing the same task every day, so automate and Self Service your IT
